

Second Series Workshops...

Creative Industries Forum

Do you work in the Creative Industries or have a passion in this area?

We would like to hear from you and discuss how we can work better together to unlock growth opportunities and support the economic, employment and skill development needs of this sector.

Across the world, there is a greater emphasis by communities in supporting their creative industries and the role they have in the “intangible value” in repositioning their economies for long-term growth and jobs.

We need to understand the best way to grow, sustain and engage with the creative and innovative businesses, and how they can help reconstruct declining uncompetitive industries and create new ones. Cultural tourism is one of the largest and fastest growing global tourism markets. Culture and creative industries are increasingly being used to promote destinations and enhance their competitiveness and attractiveness.

Creative Industries includes: Architecture, Design, Advertising and Marketing, Software and Digital Content, Film, Radio and Television, Writing and Publishing, Visual Arts, Music and Performing Arts.

The forum will include a facilitated workshop discussion to hear directly from attendees about some of the challenges and opportunities facing the sector, and information on several key initiatives in development.
